

Freightways: a group of companies that offers total, worldwide logistics

Freightways Distriservices B.V. is specialized in warehousing and distribution and in cooperation with the other Freightways companies, we offer our customers a total logistic concept.

Warehousing and Distribution

Mass-individualization and new marketing methods have led to mass-niche consumer markets that need "tailor-made" distribution solutions. In the rapidly changing economy, the consumer demands products be suited to their own specifications and requires that those products be delivered in the most efficient and effective way.

As a result of greater differentiation in products and short lead time requirements, products destined for European markets must be warehoused close to their destination. That is why Freightways has located its distribution center close to the major European gateways of Rotterdam (harbor) and Amsterdam (Schiphol air port) where we offer a total package of logistics services to our international customers.

Warehousing / Distribution services include:

- Inventory management
- Full supply chain management
- Value Added Services
- Product testing
- Reworking
- Assembly
- e-Commerce services
- Webshop services
- Pick & pack
- Bonded storage
- Non-bonded storage
- Returns management
- RF-scanning

We operate using a modern IT environment, allowing us to offer "one stop shopping" for European Supply Chain services.
